

## Fast Facts on Kosovo Early Warning Report # 12

### Key Findings:

- As compared to September 2005, satisfaction with the performance of the main institutions has remained fairly stable. After dramatic decrease in satisfaction with the work of PISG Government in September 2005 there is a slight recovery in December 2005. Similar trend has been observed with UNMIK and SRSg. On the other hand percentage of satisfied with Kosovo Assembly has continued to decrease, while satisfaction with KFOR and KPS did not change.

### Satisfaction with Main Institutions

### Kosovo Early Warning Reports

The Kosovo Early Warning System Project is a component of UNDP's regional early warning framework. The project aims to build the capacity of local analysts to foresee potential crises, and to advise crisis prevention policies. Early Warning Reports are produced quarterly. The project is co-funded by USAID and UNDP and implemented by Riinvest Institute.

This Fact sheet is based on statistical analysis of an opinion poll conducted from second half of September 2005, by Riinvest Institute. A local Serb NGO conducted the opinion poll in Serbian communities.

The survey was based in face-to-face interviews, and included 1,234 respondents: 883 Albanians, 209 Serbs, and 142 respondents from Other minorities (49 Bosnian, 22 Gorani, 25 Turk, 20 Ashkali, 2 Roma and 24 Egyptian). The sample was stratified on bases of geographic regions that are based on telephone area codes (7) and urban rural ratio (1:1).
